

B4111 Diagnostic Centre

Our standard control panel for engine driven pump irrigation:-

- Lockable enclosure, weatherproof to IP55
- Pump run timer, adjustable up to 24 hours
- Swichgage® engine oil pressure indication/shutdown
- Swichgage® engine temperature indication/shutdown
- Engine hours run counter
- Pump pressure Swichgage®, with high/low adjustment
- Off-Run-Preheat-Start Keyswitch
- 12 or 24VDC operation

The 4 position keyswitch allows manual starting and stopping of the pump. The 'pump run' timer may be used for automatic shutdown after a preset time. Auto shutdowns are fitted for:-

- Low pump pressure, set by adjustable Swichgage®. The design also allows for shutdown triggered by a customer supplied 'no-flow' switch.
- High pump pressure, set by adjustable Swichgage®
- Timer expired, or (customer supplied) emergency stop contact

Also included:-

- Low pump pressure override-on-start timer, 0 – 15 mins
- Charge warning lamp
- Fuse holder
- Pre-punched apertures for upgrade with tachometer and/or auto throttling pressure Swichgage® (available separately).
- Provision for customer supplied emergency stop circuit
- Tubing kits for pressure Swichgages®

B5001 Diagnostic Centre

As B4111 above but supplied as an open backed chassis (less lockable panel), ideal for mounting in an acoustic enclosure.

B0188 Diagnostic Centre

The original Murphy 33.400.689 irrigation pump panel, fitted in a standard steel enclosure with anti-vibration mounts. Specification is otherwise similar to B4111, but without the hours run counter and pre-punched upgrade apertures. Available with an optional 3 metre wiring harness, model B3459.
