

IF IN DOUBT ASK

NOTE:
Crank disconnect
speed will need to
be calibrated by
customer (Pot R3)

Panel Wiring
16/2 Tri-rated

Typical engine wiring shown.
This may vary according to engine equipment.
A minimum battery voltage of 8 volts must
be maintained to ensure proper operation of
the automatic circuits. Carefully select wire
sizing to minimise voltage drops, and ensure battery
is conservatively rated for installation.
