General Information

Enovation Controls is pleased to announce the transition to our new and improved AT Series tachometer. This tachometer series is a drop-in replacement to our previous tachometers. However, these new features differ from previous models:

- Improved quality
- 4000RPM dials transitioning to 3000RPM dials
- Spin-on ring clamp for quick and easy installation
- New, easy, one button speed calibration
- LED backlight replaces separate 12 and 24V filament bulbs – no need to change bulbs with system voltage.
- Every model can handle all signal inputs – charge alternator, magnetic pickup or ignition
 - AT tachometers replace separate ATA and ATS models
 - ATH tach/hourmeters replace separate ATHA, ATHS & ATHI models

Replacement Stock/Model Codes

In most American markets prior to 2017, the AT series was offered with 0 – 4000 RPM dials as standard. From 2017, the improved AT series will be mostly offered with 0 – 3000 RPM dials as standard. For a cross-reference of old 4000 RPM models to new, nearest equivalent 3000 RPM models, and further information about the new features and changes, please refer to the Manufacturing Change Notice at <http://www.murphybynovationcontrols.com/uploaded/documents/pdfs/00-02-0790.pdf>.

In Europe, Middle East, Africa and some Asia regions, the AT series was already offered with 3000 RPM dials as standard. Equivalent old and new stock/model codes are:
