Hardware Installation

The following instructions will guide you through installing the HelmView HV780 display.

Inspecting Package Contents

Before attempting to install the product, it is recommended that you ensure all parts are accounted for and inspect each item for damage (which sometimes occurs during shipping). The items included in the box are:

HV780 unit

Installation kit – P/N 78-00-0638 includes:

- 4 ea. machine screws and flat washers
- 4 Nylock nuts
- Installation manual – P/N 00-02-0882
- Operations manual – P/N 00-02-0883

Dash-Mounted Installation

Tools needed.

- Drill with 5/32" size bit
- Jigsaw
- Wrench or socket 6-32 Nylock nuts (provided) to studs

Preparing the Dash

Determine the location of the HelmView in the dash. Use the Installation Template (included at the end of the manual) as a guideline to cut a hole in the dash to the specified dimensions. Drill holes where indicated on the template for the mounting screws.

NOTE: If you downloaded this document from the Murphy website, be aware that the template pdf file may not automatically print to scale. When submitting the file for print, you will need to select None for Page Scaling. Check the accuracy of the printed template by verifying the measurements labeled on the template are correct.

If this manual was supplied with your product, the template will be correct.

Mounting the Unit

1. Place the back side of the display through the opening in the dash.
2. Use the four screws to line up the unit with the drilled holes.
3. Push the unit through the opening and screws through the drilled holes until the back of the case is flush.
4. Use the Nylock nuts provided to tighten unit to the dash. Use the appropriate wrench or socket to tighten. Torque lock nuts to 8-10 inch pounds.

Flush Mounting the Dash

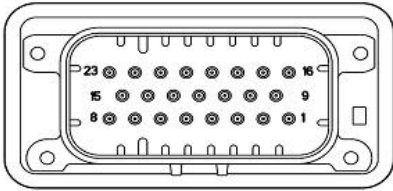

1. Cut the dash to allow for the display without bezel. Ensure enough of the material is available to properly secure the display within the dash.
2. Place the display behind dash and line up the four mounting holes on the display with the holes in dash.
3. Install four bolts and torque the 6-32 Nylock nuts to 5 inch pounds.

Signal Definitions

CAN: 3 ports according to CAN specification 2: 1 port isolated according to NMEA 2000 USB 2.0 host Video input (optional): NTSC/PAL Inputs (3) 0-5 VDC analog inputs, (1) input configurable to support measurement frequencies from 2 Hz - 10kHz values from 0-100% duty cycle Output: Digital, capable of sinking 500mA.

Wiring Schematic – Black Connector

WARNING: Failure to install the unit per the specified wiring diagrams may cause damage to the unit. **DO NOT** connect power to the video ground. Warranty is void for damage caused by incorrect wiring.

J1 (BLACK CONNECTOR)

Analog Inputs

NOTES:

- Mating connector AMPSEAL 770680-1 plug with 770854-3 sockets
- Use 20 to 16 AWG (0.5 to 1.4 mm²)
- Wire diameter of 1.7 to 2.7 mm.
- Install seal plug 770678-1 in perforated connector wire cavities
- Use 5A Slow Blow Type Fuse

Communications (CAN 2.0A/B)

Wire per J1939-11 (STP) or J1939-15 (UTP)

- J1939-11: Keep stub <1m length; up to 30 nodes; 40m max length
- J1939-15: Keep stub <3m length; up to 10 nodes; 40m max length
- Locate display node >0.1m from nearest node
- Space nodes unequally
- Keep CANbus trunk as linear as possible
- Type I - Use external 120 ohm terminator
- Type II - Enable internal terminator

NMEA 2000

Wire per NMEA 2000 (dual STP with shield)

- Keep stub <6m length; up to 50 nodes; 200m max length
- NMEA Interface is optically isolated
- Connect ECU 2 powered by Battery 2 to eliminate ground loop with ECU 1
- Shield is not connected with display

Analog Inputs

0-5 VDC Sensors

4-20 mA Sensors

Digital Inputs

Digital Output

WARNING: Failure to install the unit per the specified wiring diagrams may cause damage to the unit. **DO NOT** connect power to the video ground. Warranty is void for damage caused by incorrect wiring.

J2 (GRAY CONNECTOR)

NOTES:

- Mating connector AMPSEAL 770880-4 plug with 770854-3 sockets
- Use 20 to 16 AWG (0.5 to 1.4 mm²)
- Wire diameter of 1.7 to 2.7 mm.
- Install seal plug 770878-1 in perforated connector wire cavities

USB (Programming and Data Logging)

Video Inputs

VIDEO CAMERA NOTES

- NTSC or PAL format
- Do not mix camera types
- Follow camera manufacturer specifications for power
- Do not power camera using VIDEO GND
